

# Ancient Egyptian Life

## Great Pharaoh - Tutankhamun

King Tutankhamun came to power at about the age of 10. He died young, possibly from an accident as his body shows what scientists believe to be an injury to the head. King Tut and his tomb were found in 1922 fully intact, meaning that it had not been ravaged by tomb robbers during the thousands of years since his death. Inside his sarcophagus was a second smaller one, one that was covered in gold and blue lapis.

Almost everything in his tomb was covered in gold. The discovery of his tomb brought about a renewed interest in ancient Egypt from the public.

All kinds of discoveries happened after Tutankhamun's tomb was excavated. His is the most intact tomb that has ever been unearthed and the objects preserved inside it tell a detailed story not only of the king but of the Egypt at that time.

### Time Capsule

**What you would want to leave behind in your tomb for people to find? Illustrate and describe it here.**
